

HOW TO CONNECT TO THE AA WIRELESS NETWORK (AA-WLAN) MAC OS X (10.4 "TIGER" OR LATER)

Click on the Airport icon in the menu bar (Figure 1), and choose **Other** (Mac OS X 10.4 'Tiger'), or **Join Other Network** (Mac OS-X 10.5 'Leopard').

In the next window that appears, type in **AA-WLAN** (in capital letters) in the **Network Name** field. Change **Security** to **WPA2-Enterprise**, and type in your user name, adding **@aaschool.ac.uk** at the end (for example, sam.smith@aaschool.ac.uk), and password in the fields provided, and click **Join**.

Clicking **Continue** in the **Verify Certificate** window (Figure 3) will connect you to **AA-WLAN**.
